Smart 500 Palletiser

Low level in-feed

SECTOR

Materials Handling

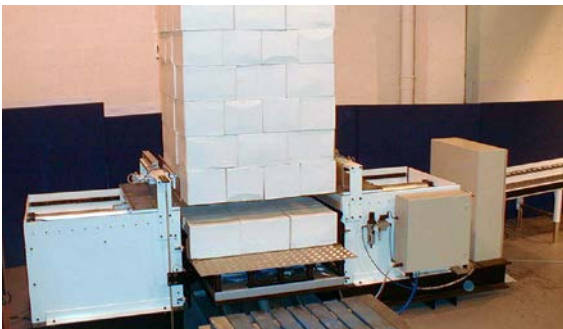

AVAILABLE

Worldwide

The Smart 500 is ideal for palletising low density, high volume products such as snacks, cereals and white goods.

Based on an innovative design using simple robust mechanisms, it offers a compact footprint combined with an exceptionally low installed height. This is ideal for applications where optimisation of restricted space is a necessity.

The Smart 500 creates a stack from the top down, allowing for pallet insertion half way up the stack; the finished stack can also be much higher than the machine itself.

KEY FEATURES

Options

- > Product orientation: 90°, 180° and 270°.
- > Stainless steel construction.
- > In feed product conveyor.
- > In feed/out feed pallet conveyor.
- > Interleave loader.
- > Data link.
- > PLC Controlled 20 programme capacity.
- > Flexible pallet size handling.

Features

- > Machine dimensions: 1650mm (w) x 2700mm (l) x 1200mm (h).
- > Max palletised weight: 500Kg.
- > Performance: 13-box layer in 30 seconds (Example).
- > Machine construction: Powder coated mild steel.
- > Power requirements: 16A.
