

Vacancy – Project Build Engineer

Job title: Project Build Engineer
Reference: 0018
Salary: £.competitive. plus benefits
Reporting to: Mechanical Team Lead

Position Type: Permanent, Full-time
Location: Nottingham
Centre: L.B. Foster Automation & Materials Handling
Closing date: 07/02/2020

Outline: Machine Build Engineer to assemble bespoke machinery with a level of machine control wiring

Indicative Responsibilities

To work as part of a team of engineers, assembling and developing machines in accordance with prescribed specification, instruction and designs and make modifications and enhancements to existing machines. To carry out development work on the machines as part of an engineering team to create the agreed solution. Must be a multi-skilled, trained mechanical engineer.

Duties and Responsibilities

- > Undertake the assembling and developing of machines to drawing
- > To work as needed in machine shop on lathes, grinding and milling machines to produce parts accurately to engineering drawings as required
- > Working as part of a team and individually, both in the factory and at customer's sites to assemble and develop machines and engineering solutions in the UK and worldwide
- > Commissioning of machines, machine performance testing, factory acceptance and site acceptance
- > Learn and observe relevant procedures associated with the Company's quality systems
- > Observe and adhere to company policies in respect of health and safety, The Health and Safety at Work Act and the COSHH regulations.
- > To carry out maintenance and service on LB Foster Automation & Materials Handling installations worldwide.

Skills & Experience Required:

- > Minimum 5 years experience relating to automation machinery
- > Understanding of pneumatics/hydraulics
- > Electrical knowledge preferable but not essential
- > Ability to communicate well with customers, suppliers and team members
- > Excellent manual dexterity
- > Creative thinking skills and ability to troubleshoot equipment problems
