

Vacancy – Product Development Manager

Job title: Product Development Manager	Position Type: Permanent, Full-time
Reference: 0032	Location: Nottingham
Salary: £.competitive. plus benefits	Centre: TEW Engineering
Reporting to: Divisional MD TEW Engineering & TEW Plus	Closing date: 23/04/2021

Outline: As the Product Development Manager of the LB Foster global technology group, based in Nottingham UK, you will be responsible for the engineering and development of our new and existing product portfolios from strategy to commercialisation. The new product portfolio currently comprises of active and passive remote condition monitoring (RCM) technologies and forms a key component of the organisation's global technology strategy. It is preferable that you have relevant product knowledge in this sector. The existing product set includes electronic visual display systems and it is desirable that some knowledge exists within this product area. Your prime role will be to deliver new products in line with the company's annual operating plan (AOP) and rolling 3-year strategic plans.

Indicative Responsibilities Include:

At strategic level you will be responsible delivering the company's global technology development plan. At Business development level you will be integral in development of future product strategy, assist driving growth through the securement of orders for new & existing products and the continual evolution of product roadmaps.

At operational level you will be responsible for:

- > Execution of the product roadmap.
- > Management of the hardware and systems teams for the execution of the product development process.
- > Product Cost control.
- > Reviews & key stakeholder engagement.
- > Working with the Conformance Manager to ensure regulatory compliance, stakeholder sign off & release to manufacture.
- > Client Documentation and manuals.
- > Provide technical leadership support for commercialised & non-commercialised solutions.
- > Evaluate and review tenders/opportunities, contributing to scope, costing, return on investment and market potential.
- > Adopt, improve and own structured Product Development processes.

Skills & Experience Required:

- > Minimum of a Bachelors degree in a technical discipline (2:1 or above).
- > Technical competence in electrical & electronic applications.
- > Software development & implementation insights.
- > Good understanding of mechanical design engineering.
- > Experienced at introducing new products/processes in a technology-based environment.
- > Experienced in leading a technology-centric product development team with demonstrable success.
- > Able to lead cross-functional/cross-divisional teams on a project by project basis.
- > Capable of producing detailed reports covering completed and projected activities.
