| <b>Job title:</b> Project Engineer            | <b>Position Type:</b> Permanent, Full-time |
| <b>Reference:</b> 0033                        | <b>Location:</b> Nottingham                |
| <b>Salary:</b> £. competitive. plus benefits  | <b>Centre:</b> L.B. Foster TEW Engineering |
| <b>Reporting to:</b> Head of Special Projects | <b>Closing date:</b> 30/06/2021            |

### Outline:

The role will be responsible for co-ordinating remote condition monitoring (RCM) projects ensuring they are delivered to budget, schedule, and customer requirements. This will include liaising with all key stakeholders across the business and resolving emergent issues in a fast-paced environment.

### Indicative Responsibilities Include:

- Ensure that all projects are delivered within budget, on-time and to scope.
- Working with designated project teams to ensure that planning and progress of the design, build, test, and installation is to customer specification.
- Identifying, managing, and resolving emergent issues.
- Acting as the go to person for project queries and clarification.
- Contribute to design and development of products.
- Co-ordinating new project and product quotes ensuring all aspects are costed.
- Identifying project risks at the pre-sales phase, using lessons learnt from similar historical projects.

### HEALTH & SAFETY RESPONSIBILITIES:

You are responsible for ensuring that you and any staff or sub-contractors under your management or control work safely and comply with:

- All current and relevant health and safety and environmental legislation including the Railway Group and Company Standards.
- Assess and control risks and plan and implement safe methods of working and are competent to carry out the task.
- The safety of passengers, the general public and the environment is not affected by the activities of you, your staff, and contractors under your control.
- Accidents, incidents or near misses are reported to your Manager, and the accident book is filled in promptly.
- Participate in the company cascade safety briefings.

### Skills & Experience Required:

- Excellent communication skills with the ability to negotiate with both internal and external stakeholders.
- Deliver a project successfully - Able to work under pressure and drive projects forward calmly.
- HND/HNC or degree level in an engineering subject.
- Proficient in the use of 2D/3D CAD Systems (Preferably Auto CAD).
- 2-3 years' experience managing projects.
- Prior experience with Electromechanical products.
- Able to travel both in the UK and abroad for customer meetings, installations, and commissioning (Occasional).
- Organised with excellent attention to detail.
- Work well individually and as a team.
- Financial Management skills.
- Computer literate.
