

## Vacancy – Technical Test Analyst

<b>Job title:</b>	Technical Test Analyst
<b>Reference:</b>	0045
<b>Salary:</b>	£.competitive. plus benefits
<b>Reporting to:</b>	Technical Operations Manager

<b>Position Type:</b>	Permanent, Full-time
<b>Location:</b>	Lincoln
<b>Centre:</b>	L.B. Foster Netpractise
<b>Closing date:</b>	30/09/2021

**Outline:** Responsible for ensuring the quality of software output - Netpractise (Lincoln).

**Position Description:** Reporting to the Technical Operations Manager and part of the Projects team, the Technical Test Analyst will be responsible for working with our developers to understand customer requirements and technical elements of specifications, deploy and configure software updates, execute & maintain test plans and scripts and log & track bugs and defects. The Technical Test Analyst will be expected to investigate software defects by inspecting application and system logs, databases and scripts, and provide technical feedback to development teams to assist with identifying root causes. The Technical Test Analyst will be expected to work on multiple projects concurrently and therefore must be capable of prioritising their own workload and challenging others where project delivery is at risk.

**Major Areas of Responsibility:**

- > Carry out testing on:
  - Applications – Websites - APIs- Databases
- > Provide technical elements to the planning, design and execution of tests for mitigating performance, security, reliability, portability and maintainability risks.
- > Log and track bugs and defects via DevOps in a SCRUM environment.
- > Support the Quality Analyst with technical input and knowledge transfer.
- > Participate in reviews with developers and software architects applying knowledge of typical defects in the code and architecture.
- > Identify technical issues and raise to project leads and stakeholders.
- > Identify and flag risks to project delivery.
- > Analyse data feeds and API end-point outputs.
- > Prepare and execute handover activities to transition from project phase to BAU.

**Skills & Experience Required:**

- > ISTQB Technical Test Analyst qualification or relevant experience.
- > Knowledge and experience working with:
  - SQL Databases - Microsoft technology stack (Windows, Windows Server, IIS) - Microsoft Azure
  - JSON – HTML - CSS
- > Able to take initiative and fantastic attention to detail.
- > Leadership potential.
- > Excellent relationship & communication skills.
- > Equally keen to work within a supportive and collaborative team culture and share the team's success.
- > Comfortable working and liaising with the technical teams.

**To Apply:**
