Outline:

As part of our continuing growth we are looking to expand our production team by appointing a Planning Engineer, reporting directly into the production manager.

This is a key role within the team, with the main function being system based looking at the lifecycle of the product from beginning to end, including but not limited to; document control, drawings, manufacturing documentation using LB Fosters MRP and admin systems as well as logistical support from creation of works order to despatch . The role will encompass an element of customer facing activity, along with building relationships with key stakeholders in the business supported by knowledge of technical and engineering disciplines will be required.

Essential Functions:

- > Understand project specifications and contract requirements
- > Monitor and maintain operational processes through project lifecycle
- > Ensure projects are delivered within budget, on time and to customer requirements
- > Attend meetings with customers both internally and externally as required
- > Maintain strict document control processes
- > Create and maintain system part numbers, BOMS and methods of manufacture
- > Health and Safety responsibilities, including but not limited to:
 - > Ensuring accidents, incidents and near misses are reported accordingly. Participate in company safety briefings.

Skills, Experience & Competencies required:

- > HNC/HND or degree level - Engineering subject/disciplines
- > Min 2-3 years' experience working in a planning or project Eng. role
- > Knowledge and application of engineering disciplines and processes
- > Experience of understanding and interpreting technical drawings and specifications
- > Ability to work individually or as part of a cross functional team
- > Experience of working in a continuous improvement/development focused organisation
- > Experience of working with demanding timescales and in a fast-paced environment
- > Able to plan and prioritise
- > Excellent attention to detail, ensuring tasks are complete right first time
- > Applies technical knowledge to solve a range of problems
